

Connect Firebase

One-time setup for real-time orders across all devices

Step 1: Go to console.firebase.google.com → Create project → name it "**fresh-cafe**"

Step 2: In your project → click ⚙ Settings → **General** → scroll down → click **Add App** → choose Web (</>)

Step 3: Go to **Build → Realtime Database** → Create Database → choose any location → Start in **Test mode**

Step 4: Copy your Firebase config and paste it below:

```
{  
  "apiKey": "...",  
  "authDomain": "...",  
  "databaseURL": "...",  
  "projectId": "...",  
  "storageBucket": "...",  
  "messagingSenderId": "...",  
  "appId": "..."  
}
```
